

Sicilian Excellence Worldwide

SCYAVURU®

THE TRUE TASTE OF SICILY

From Sicilian soil to more than 60 countries

Founded in Ribera in 1950 by two farming families, the Tortorici and the Tornambé, Scyavuru has turned over 80 years of expertise in raw materials into a modern centre of production excellence. An authentic story, now evolved through technology, research and direct control of the supply chain.

FULL CONTROL MAKES ALL THE DIFFERENCE

Shelling, sorting, roasting, processing and spread production all take place within our own production hub. Three specialised production lines allow us to process raw materials directly, without relying on third-party industrial semi-finished products. This is how we combine industrial precision with artisanal sensitivity, ensuring purity, consistent quality and a distinctive sensory profile.

A CONSCIOUS CHOICE

For us, developing palm oil-free spreads means turning a formulation choice into a concrete commitment to more responsible, environmentally conscious production. Through research and the selection of more sustainable raw materials, we aim to preserve quality, flavour and creaminess while reducing our environmental impact and using resources consciously. Innovating responsibly today to build a better tomorrow!
